Education

Master in Computer Science and IT
EIIT Faculty, SSU, 2020-2021

Bachelor in Computer Science and IT
EIIT Faculty, SSU, 2016-2020

Languages

Ukrainian -- Native | English -- B2

Summary

Unity/C# Developer with 5+ years in mobile F2P. 17+ shipped titles across hypercasual, casual, and bingo genres on Google Play and App Store. Production experience with real users, payments, LiveOps, and analytics.

Work Experience

Playcus (Mobile F2P Games Studio, Kyiv/Remote)

Unity Developer: jan 2021 - dec 2025 (5 years)

Primary developer on most projects, coordinating with cross-functional teams (dev, art, GD, QA). Regularly filled art integration roles: animation setup, UI layout, asset integration, 3D pipeline guidance.

Hypercasual

Built from scratch and maintained long-term (1-3 years per title): War Machines 3D, Groomer Run 3D, Cats Groomer Runner, Cats Run 3D, Animals Merge. Also developed several unreleased prototypes (8+ projects total).

- Full-cycle: from initial prototype to long-term support with new features, content updates, and optimization
- Managed up to 6 projects at a time: 1-2 in active development, rest in support/updates mode
- Performance and UI optimization: Unity Profiler, Frame Debugger, GC reduction, Canvas hierarchy, overdraw, low-end device focus
- Analytics integration and funnel design (DevToDev, GameAnalytics, custom events)
- Defined event strategies: what to track, what business insights they provide
- Proposed own game concepts to management; some were approved for prototyping

Casual

Feature development on existing titles: Groove Masters (DJ Drum Pad), Drum Pad Stars, Word Ways, Find the Difference, Bingo Home Makeover, Perfect Everything.

- Joined existing projects, added new features and maintained codebase
- Adapted to different coding styles and architectural decisions of original developers on each project
- Economy design and balance tuning across multiple genres (music, word, hidden object, bingo)

Bingo / Client-Server Production

Worked on a single Bingo platform shipped as 6 product variations: Bingo Star, Bingo Farm Ways, Bingo Country Boys, Bingo Country Days, Bingo Kingdom Arena, Bingo Country Ways.

Platform: Unity client + custom PHP backend + admin panel (user data dashboard, purchase history, player profiles).

- Feature development and maintenance on Unity client side
- Legacy code work: inherited projects with minimal documentation, local refactoring and architecture improvements. Resolved issues with async animations lacking fallbacks and skip logic
- Worked across 6 project clones with mixed shared/unique codebase -- each new feature required decisions on generalization vs project-specific implementation
- Refactored legacy IAP billing system from hardcoded table-based approach to SDK API-based architecture
- After team downsizing, took ownership of analytics: audited events, redesigned funnel structure, deployed across all 6 projects
- Payments support: Google Play IAP + subscriptions, App Store IAP, Windows Store IAP, Facebook IAP -- each platform requiring its own flow
- LiveOps: worked with remote config, feature flags, A/B experiments
- Worked with Addressables + Asset Bundles + custom asset delivery server
- CI/CD pipeline (Jenkins): used for builds and deploys, configuration changes, troubleshooting
- Localization: I2 Localization + Google Sheets, 14+ languages, adapted fonts and assets
- Maintained and extended custom Editor tools: localization fonts loader, project dependency search, prefab dependency matrix, asset bundle grouping for artists
- Used Firebase Crashlytics for crash monitoring, Firebase Cloud Messaging for push notifications
- Platforms: Android, iOS, Windows Store, Web (Facebook / WebGL)

AI-Assisted Development (R&D)

- AI-agent orchestration for game generation using Claude Code
- Documentation generation, task delegation to sub-agents
- Iteratively reproduced Bingo project using AI pipelines, refining workflow with each iteration
- Flutter project generation with Claude Code

Freelance

Unity Developer: may 2020 - dec 2020 (8 months)

- Prototyped 6+ hypercasual games
- Full-cycle: game design concepts, art direction, gameplay, analytics/SDK integration
- Coordinated a team of 3-5 people (dev, art, game design)

AMC Bridge LLC (Engineering Software, Sumy, 200+ employees)

Software Engineer: jun 2019 - may 2020 (1 year)

- Web development (C#, JavaScript) on complex enterprise platform Aras Innovator
- Developed UI modules, integrations, and business logic for engineering products
- CAD engine development (C++)
- Formal corporate environment: code standards, structured processes, cross-team collaboration

Krikzz (Retro Console Hardware, Sumy)

Junior Engineer: feb 2018 - jan 2019 (1 year)

Company: krikzz.com -- manufacturer of custom retro console cartridges.

- FPGA development (Verilog), NES game mapping for EverDrive N8 Pro
- Software tooling for hardware product line

Technical Skills

Core

Unity | C# | .NET/Mono | UGUI | Canvas optimization | UniTask | async/await | Coroutines | ScriptableObjects | Unity Profiler | Frame Debugger | GC optimization | IAP | Subscriptions | Analytics | DevToDev | GameAnalytics | Funnel design

Production Environment

PureMVC | ServiceLocator | Addressables | Asset Bundles | Remote config | Feature flags | A/B experiments | Jenkins CI/CD | Firebase Crashlytics | FCM | MAX | AdMob | I2 Localization | REST API | Git | Agile

Additional

Animator | DOTween | Timeline | URP | HLSL | Shader Graph | Android | iOS | Windows Store | WebGL | Claude Code | AI-agent orchestration

Familiar With

ECS/DOTS | Zenject | Flutter | Blender | Photoshop

Shipped Titles

Built from scratch, maintained long-term

War Machines 3D | Groomer Run 3D | Cats Groomer Runner | Cats Run 3D | Animals Merge

Feature development

Groove Masters | Drum Pad Stars | Word Ways | Find the Difference | Bingo Home Makeover | Perfect Everything

Bingo platform

Bingo Star | Bingo Farm Ways | Bingo Country Boys | Bingo Country Days | Bingo Kingdom Arena | Bingo Country Ways

All titles available on Google Play. Most also on App Store, Windows Store.
